

React/AngularJS

Image/Photo Comparison SPA

Create a single page application wherein list of photos gets displayed in a grid along with a COMPARE button on each of the photo item

Create a comparison table below the photos listing.

When a user clicks on the COMPARE button over the photo, that particular photo should be added to the comparison table below the list, and also the COMPARE button should turn to the REMOVE button.

Same way, users can add as many photos as She/he want to the comparison table.

The comparison table shall show photo title , photo URL and photo thumbnail URL and also display the photo

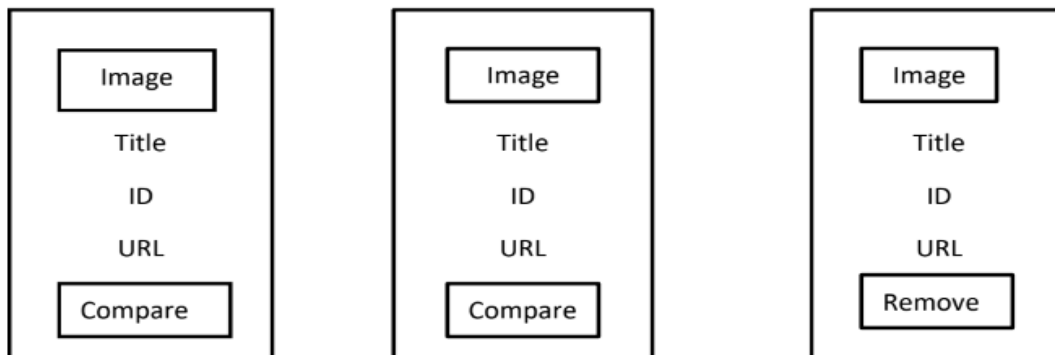

When the user clicks on the REMOVE button over the photo on the photo listing page, that photo should be removed from the comparison table.

Please use below API URL to get list of photos and their details:

<https://jsonplaceholder.typicode.com/photos>
